The Iridium Axxess Point is a Wi-Fi enabler accessory and software solution. Its allows users to benefit from the global coverage of Iridium satellite networks on their smartphone, tablets or laptops. Designed to establish internet connection anywhere on earth, the Iridium Axxess Point extend communication capabilities and usage. It can be combined with the Iridium 9505A, 9555 and Extreme handsets.

Creates a Wi-Fi Hotspot, extending Iridium network to any Wi-Fi enabled smartphone, tablet or laptop for email or web browsing of mobile websites.
