ISATHUB: MORE THAN JUST A WIFI HOTSPOT

IsatHub from Inmarsat allows smart phone or tablet to work seamlessly, anywhere on the planet, completely independent of cellular or fixed networks.

IsatHub enables users to talk, text, and access the Internet on any smart device, anywhere inside – or outside – the coverage of cellular or terrestrial comms, with one global tariff.

Using data speeds of up to 384kbps and an unrivalled network availability of 99.9 per cent, IsatHub is easy to set up and provide 30 meters Wi-Fi range.
