# THURAYA X5-TOUCH

The first Android satellite & GSM phone

**COMMUNICATES SEAMLESSLY BETWEEN SATELLITE & GSM MODES**

**GMPRS UP TO 60/15 KBPS (DOWNLOAD/UPLOAD)**

**HAS A DEDICATED SOS BUTTON, WHICH IS EASY TO USE IN TIMES OF DISTRESS**

**RUNS ON THE ANDROID PLATFORM FROM GOOGLE**

**PROVIDES WI-FI, BLUETOOTH AND NFC CONNECTION**

The Thuraya X5-Touch provides you with an uninterrupted network connection in any environment. It further bridges the gap between terrestrial and satellite communications through its full dual mode, and provides you the ability to have satellite and GSM smartphone modes “always on” simultaneously. It incorporates two nano SIM-card slots to easily switch between modes. Now, you can stay in touch with only one smartphone.

## Key Characteristics:

- **A talk-time of up to 11 hours** and a **standby time of up to 100 hours**
- Advanced navigation capabilities due to **GPS, BeiDou et Glonass**
- A **5.2" full HD touchscreen** made of glare resistant Gorilla glass that works even when the display is wet or while you are wearing gloves
- Works over Thuraya’s **L-band satellite network** as well as GSM networks
- **Data services** include GmPRS up to 60/15 Kbps (download/upload), circuit switched up to 9.6 Kbps, and LTE up to 300/150 Mbps (download/upload)
- Ingress protection includes **water resistance, dust resistance (IP67)**, and compliance with MIL-Standard 810 G/F (**shock, vibration, extreme temperature**)

## 10 Reasons Why:

- 1. State-of-the-art network coverage:** Terrestrial coverage across a range of market sectors, including in remote areas. Never drop a call again no matter where you work.
- 2. Dual mode capability:** ‘Always on’ SAT and GSM networks for a truly dual experience. Experience seamless communications between network modes.
- 3. Advanced navigation capability:** Ability to send current location details to pre-defined numbers based on pre-set time intervals, distance travelled, or movement between pre-set geofences.
- 4. Dedicated SOS button:** Dedicated SOS button even when phone is switched off. You can depend on this true partner in any emergency situation.
- 5. Fully rugged phone:** Most rugged phone in the industry with IP67 standard and MIL 810 G/F compliance. No matter the environment, this is the only phone you need.
- 6. Powerful battery:** Most powerful battery with a standby time of up to 100 hours. Possess a communication tool that’s always at your service.
- 7. Cutting-edge antenna:** Omni-directional antenna that’s designed to ensure enhanced mobility. You’re never out of range of a network signal.
- 8. Fully customizable apps:** Easily personalized phone experience with pre-loaded apps on the Google platform as well as access to apps from Google Play.
- 9. Inbuilt phone sensors:** Sensors include gyroscope, accelerometer & geomagnetic, ALPS, and digital pressure. There’s a lot more you can do with your phone than keep in touch.
- 10. Active noise cancelling:** Multi-microphone active noise cancelling for crystal clear communications. Hear what’s said as if you weren’t kilometres away.
