AND OPERATE**

As a compact and cost effective solution, Thuraya Indoor Repeaters are designed to provide network coverage in indoor environments such as buildings and tunnels as well as outdoor zones with limited or no satellite reception. You can opt for a single or multi-channel repeater. With the single channel, you can handle one call or session at a time over fixed or portable versions, while multi-channel repeaters allow up to 10 users simultaneous access to Thuraya's mobile satellite services.

Benefits:

- Thuraya offers three types of Indoor Repeaters:
 - Single-Channel Repeater (fixed)
 - Single-Channel Repeater (portable)
 - Multi-Channel Repeater (fixed)
- Supports Voice, Data, and Fax up to 9.6 kbps, SMS and GmPRS up to 60/15 kbps (download/upload)
- Covers bigger spaces with multiple repeaters working together
- Ensures maximum signal strength with a rotating outdoor antenna
- Offers optimal reception to extend the battery life of the handset
- Covers area up to 100sqm (depending on room layout)
- Indoor Repeater: 120mm x 170mm x 64mm
- Outdoor Antenna: 124mm x 164mm x 51mm
- Weight Indoor Repeater: 1.2kg
- Weight Outdoor Antenna: 0.4kg
- Multi-Channel Repeaters
 - Handles up to 10 calls or sessions simultaneously
 - Covers area up to 530sqm (depending on room layout)
 - Indoor Repeater: 213mm x 180mm x 39mm
 - Outdoor Antenna: 124mm x 164mm x 51mm
 - Weight Indoor Repeater: 1.68 kg
 - Weight Outdoor Antenna: 0.4 kg

Specifications:

- Single-Channel Repeaters
 - Handles one call or session at a time
