

FLEET XPRESS

A reliable high-speed satellite
communication network offering
seamless service across the globe

GLOBAL COVERAGE

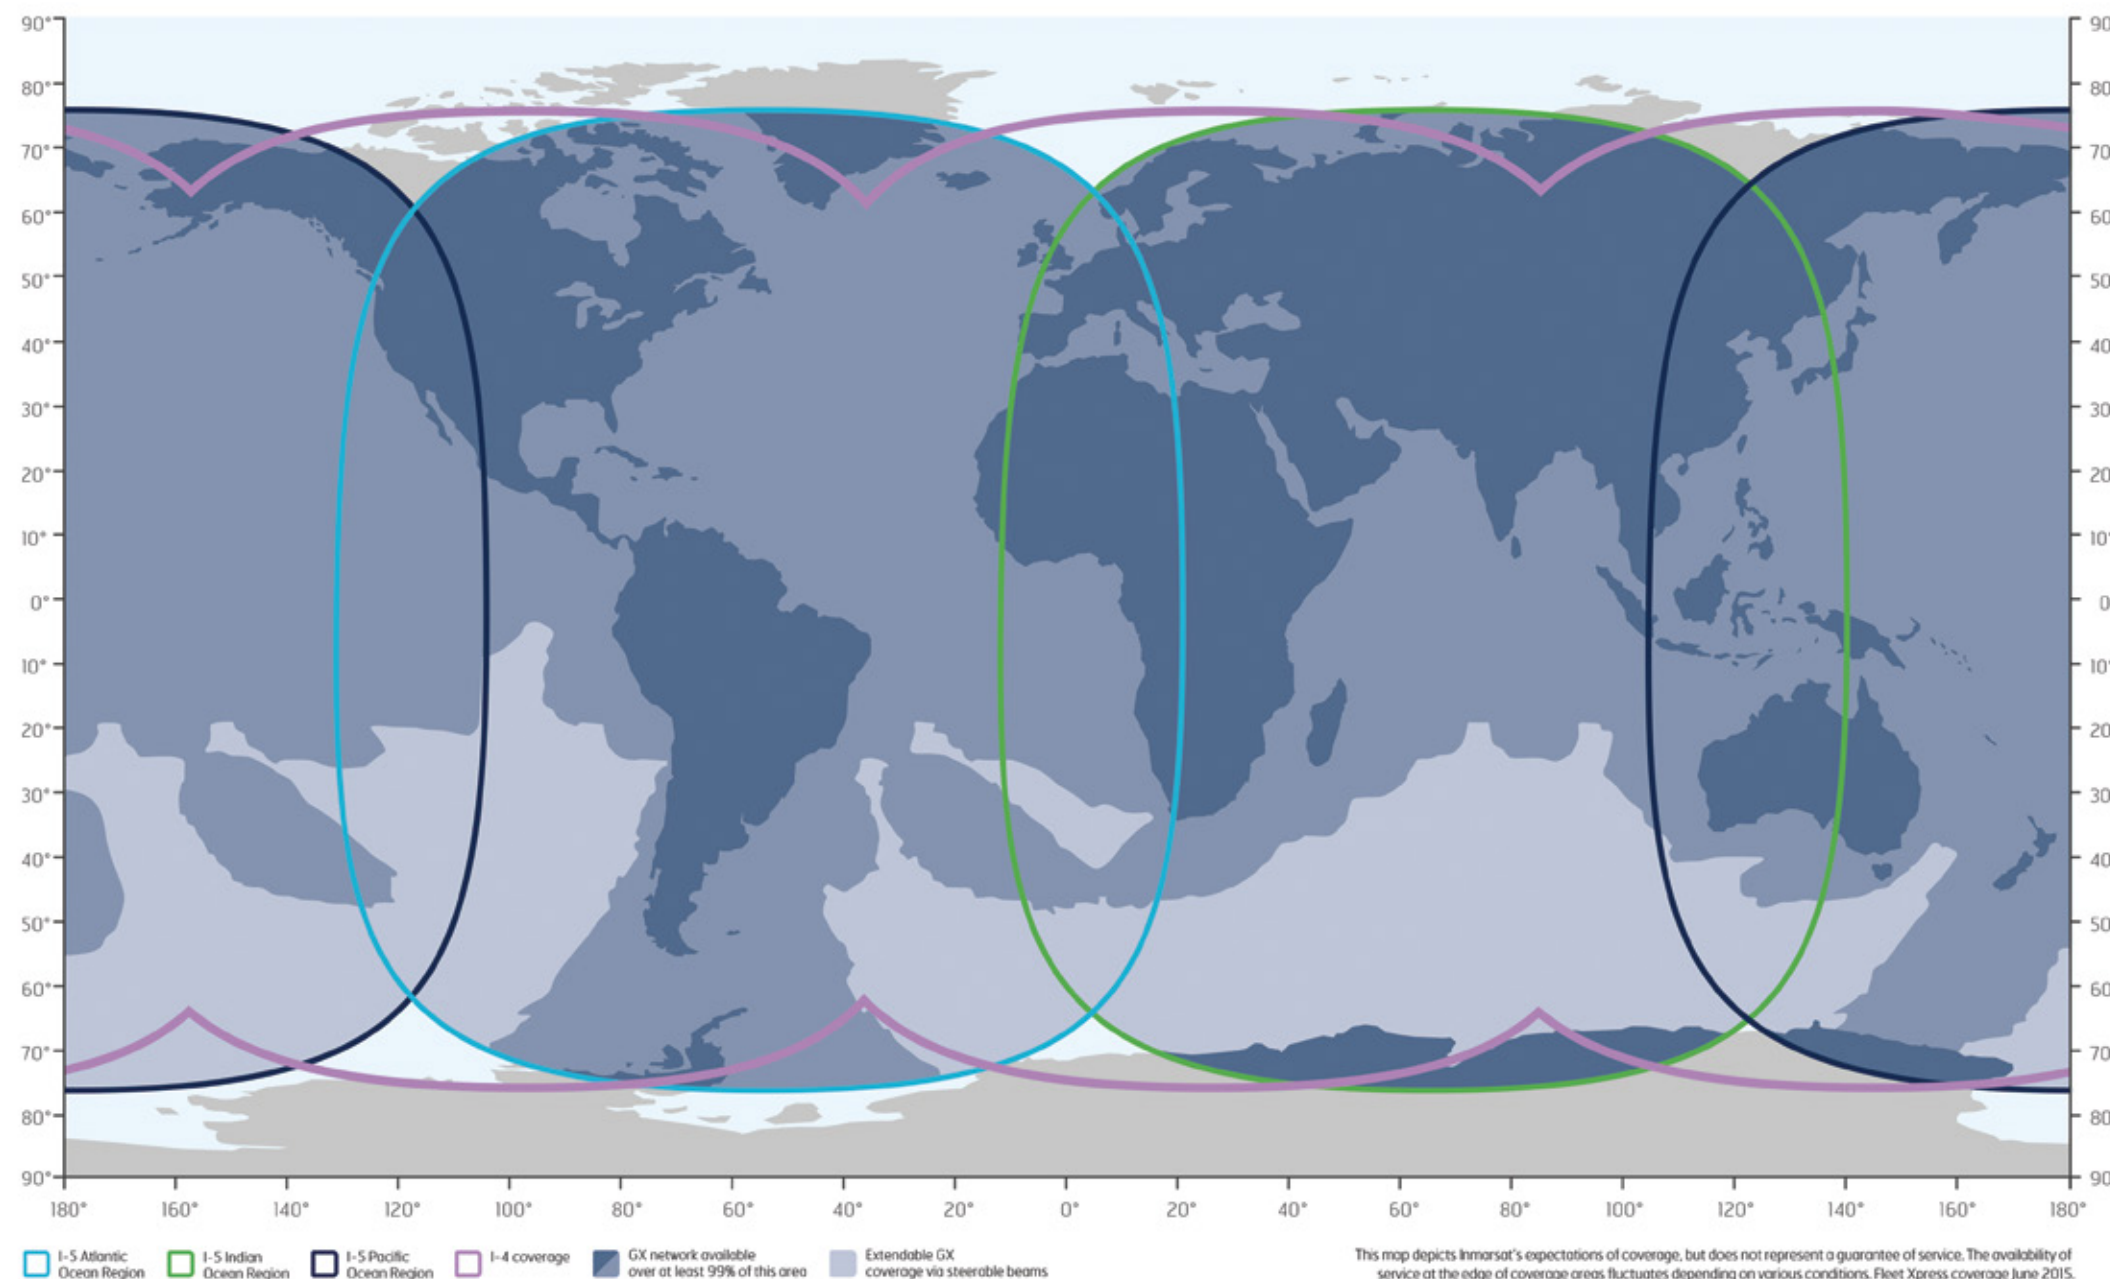

A SECURE, INTEGRATED MARITIME SERVICE

INCREASED BANDWIDTH CAPABILITIES

STRONG MARITIME EXPERIENCE

MULTIPLE VOICE OPTIONS FOR CREW AND OPERATIONS

A VARIETY OF FLEXIBLE DATA PLANS

OVERVIEW

Fleet Xpress delivers a high-speed satellite network that is enabled by a combination of Inmarsat's Global Xpress Ka-band technology and the proven reliability of FleetBroadband. As Global Xpress is the first and only globally available network owned and managed by a single operator, Fleet Xpress ensures that customers experience seamless communications as their ships move across the globe.

Purposely designed for mobility, Fleet Xpress provides seamless service with traffic handled continuously across each spot beam and between satellites around the world, all delivered by Inmarsat. Switching between satellites is handled automatically by a tracking system without the need for any intervention by the crew. In the unlikely event of degradation in the Ka-band signal, the onboard Network Service Device (NSD) seamlessly switches to L-band, resulting in no break in service.

A FULLY MANAGED SERVICE

- Onboard terminals automatically connect to each GX beam as part of the Fleet Xpress fully-managed service, ensuring clients a continuous and seamless service.
- The proven reliability of the FleetBroadband secures a high-speed network connection redundancy in the event of terminal failure, shadow, or if the FX is out of coverage.
- A dedicated network offers remote fault and configuration management of the terminal.

KEY FEATURES

- CONTINUOUS CONNECTIVITY**
Ultimate reliability through a dual satellite constellation, using Ka-band with unlimited L-band back-up, ensures seamless global mobility
- GUARANTEED PERFORMANCE**
Committed data rates backed-up by service level agreements guarantee that the customer always gets their payment's worth
- CONTROLLED COSTS**
More accurate cost management with a wide selection of flexible subscription packages and a single invoice
- FULLY MANAGED SUPPORT**
Standardised plug- and-play service with 24/7/365 management, monitoring and support globally, for simplicity and complete peace of mind
- VALUE ADDED SERVICES**
A unique offering from IEC Telecom with OneGate Maritime puts you and your vessels at the forefront of the drive for enhanced digitalisation

HARDWARE OPTIONS

- VSAT**
 - Intellian GX60 NX, GX100 NX
 - Cobham Sailor 100 GX/ 60 GX
- L-Band**
 - Cobham FB 500/FB 250
 - Intellian FB 500/FB 250
