# ONEGATE MARINE COMPACT

Lightweight future-ready solution  
for uninterrupted communication

**FULL COMMUNICATIONS CONTROL FOR SAFE AND SECURE BUSINESS OPERATIONS**

**HIGHLY ADAPTIVE VIRTUAL PLATFORM TO KEEP AHEAD OF DIGITAL TRANSFORMATION**

**SCALED TO FIT EVEN ON VESSELS WITH LIMITED SPACE**

**FULLY OPTIMIZED EMAIL SERVICE WITH HIGH COMPRESSION**

**AUTOMATED FILE TRANSFERS THAT RESTART FROM POINT OF INTERRUPTION**

## **FUTURE-READY SOLUTION FOR ALL VESSEL SIZES**

Agile, lightweight, and easy to install, OneGate Marine Compact is a future-ready solution that can fit even on vessels with limited space. With customizable dashboards that meet specific communications requirements of racing boats, OneGate Marine Compact offers easy control over your network while keeping costs at bay. This unique platform provides you with optimum connectivity wherever you set sail. With the skipper and onshore team always in sync, and full visibility of your onboard network, OneGate keeps you connected at all times.

## **FULLY OPTIMIZED AND SECURE EMAIL SERVICE**

OneGate Marine Compact delivers a secure, stable, cloud-based email service, which enables essential business communications in an optimized manner. The web dashboard allows for remote configuration and administration of vessels, making life easier for both crew and shore-based IT Teams. Some of the features of the email service include:

- Fully optimized email transfer with high compression
- Restart from point of interruption of transfers
- Advanced threat protection & anti-virus
- Anti-phishing & spam management
- High availability
- One-click pre-configured installation
- Selectable mail flow option

## **RELIABLE AND AUTOMATED FILE TRANSFER**

OneGate Marine Compact offers the best-in-class data synchronization application that allows IT managers to configure, monitor, and execute simultaneous file transfer tasks from a central location. Utilizing its powerful scheduler, tasks can run automatically with no human intervention. Some of the features are as follows:

- Central control and management from shore
- Remote folder synchronization
- High data compression
- Restart from point of interruption of transfers
- Automation and bi-directional transfer
- Comprehensive reporting and journaling

## **LOCAL DASHBOARD**

- Link status
- Data usage monitoring
- Voucher management

## **FILTRATION AND USAGE CONTROL**

- Two-stage filtration possible, onshore and offshore
- Application identification and categories classification (WhatsApp, etc.)
- Advanced usage reports to provide full visibility of communications traffic

## **INTEGRATED LTE FAILOVER**

- Integrated SIM card slot to reduce costs
- Seamless failover between LTE and satellite links
