# SATTRANS WIFI COMMSTATION FOR XT-PRO

Satellite service on your preferred device

**SATELLITE SERVICE  
ON PERSONAL DEVICES**

**WIRELESS ACCESS POINT  
FOR UPTO 10 DEVICES**

**PBX CAPABILITIES**

**EXTENDABLE  
ARCHITECTURE**

**COMPATIBLE WITH  
THURAYA NETWORK  
AND TERMINALS**

The SatTrans WiFi CommStation offers an unparalleled communications service on your preferred device by creating a satellite-backed WiFi hotspot. This versatile solution is designed for use in passenger cars, trains, ships, yachts, and boats, and offers the capability to communicate over laptops, tablets, and smartphones separated from the satellite unit.

With PBX capabilities that allow in-network voice, data, and text messaging services to connected devices, the WiFi CommStation offers a satellite-backed wireless access point for up to 10 WiFi enabled devices. Moreover, multiple CommStation units can be networked together to provide extended an WiFi range and connect even more devices.

The SatTrans WiFi CommStation is the perfect solution for sailors, truckers, business travelers, explorers, residents, and anyone out of cellular range.
