

# BEAM ISATDOCK2 PRO

Intelligent docking station for  
handsfree use

## ISATPHONE2 HANDSET CHARGING

## TRACKING AND SOS FUNCTIONS VIA ISATPHONE2

## IN-BUILT SPEAKER AND MICROPHONE

## HANDSFREE AND IN-CALL MUTING CAPABILITIES

## PABX INTEGRATION

BEAM IsatDOCK2 Pro is an intelligent docking station for the IsatPhone2. The docking station features RJ11/POTS interface, Bluetooth, handsfree speakerphone, and a privacy handset for voice services. It supports standard handsets that are corded upto 600m, cordless, and DECT as well as a PABX system interface.

BEAM IsatDOCK2 Pro enables Inmarsat IsatPhone2 handset charging, a USB data port, and in-built ringer. It supports a Personal Alert and Tracking functionality while the handset is docked. Moreover, BEAM IsatDOCK2 Pro is key lockable and comes with both wall and desk mounting options.

With an all-in-one design that completely covers the IsatPhone2 handset, in-call and speakerphone muting facilities, and auto-dial and speed dial features, BEAM IsatDOCK2 Pro is the ideal docking station for both handsfree and privacy handset use.
