

BEAM SATDOCK-G IRIDIUM 9555

The perfect handsfree dock
for superior voice quality

**IRIDIUM 9555 HANDSET
CHARGING**

**IN-BUILT ECHO
CANCELLING**

**EASY SWITCHING
BETWEEN HANDSET
AND HANDSFREE MODES**

**TRACKING AND ALERT
SYSTEM**

**ROBUST DESIGN
AND CONSTRUCTION**

With built-in echo cancelling and full duplex technologies that provide superior voice quality, BEAM SatDock-G is the perfect handsfree docking station for your vehicle. It supports tracking and alerts via a dedicated GPS engine, pre-configured periodic reporting and a manual position report via a button press, remote polling, and emergency alerts via SMS to email or Short Burst Data (SBD).

The Iridium 9555 satellite handset fits securely into the SatDock-G as one single compact dock, and features phone charging, Bluetooth, USB data, in-built ringer, and integrated antenna, data, and power connections to enable a permanently connected read-for-use dock. The dock easily switches between handset and handsfree modes and comes with an auto-sensing answer and hang-up intelligence.

The SatDock-G cradle features an in-built panic-alert button and supports an optional privacy handset or the fully featured intelligent handset, RST970.

CHARACTERISTICS

- Weight: 0.37 kg
- Dimensions: 200.0 x 75.0 x 65.0 mm
- Temperatures
 - Operational (°C): -20°C to +70°C
