

KEY FEATURES:

- OptiSoft allows remote configuration and administration of vessels and fleets via a single dashboard, making life easier for both crew and shore-based IT teams

- Organise your fleet per ship or vessel group
- Create one-step silent installs for onboard software deployment
- Allows for rules, alerts and reports to be set up at both a vessel and group level

The screenshot shows the OptiSoft dashboard for IEC Telecom. On the left, there are search filters for 'Groups' (listing various IEC Telecom regions) and 'Vessels' (listing Vessel A through H). The main area displays a table with columns for 'Description', 'Group', 'OneMailPro', 'OneCover', 'GTEnoadPlus', and 'OneMail'. Below the table are navigation tabs for 'Summary', 'Status', 'Tools', and 'Metrics'. On the right, there are tabs for 'General', 'OneMailPro', 'Archiving', 'OneCover', 'eNOAD', 'Downloads', and 'UserAdmin'. A user profile 'WELCOME JALLOUL.BENSOUSSIA@IEC-TELECOM.COI' is visible at the top right.

Manage vessels or custom groups

Easy search function for all vessels

Monitor status in real time from any device

Ability to set up rules, alerts and reports

View metrics on data usage, connections and domains

Access and configure your apps remotely

What's New function: access all current changes and fixes as well as a historical list

Flexible set up: apply configurations across all vessels, sub-groups or individual vessels

Cloud based dashboard which can be accessed from any web-enabled device

Ability to download all products and manuals

Vessel N	IEC Telecom Europe	●		●	●

IMO 2021 COMPLIANCE

OptiSoft offers a comprehensive portfolio of cyber security solutions which will help vessel owners to comply with IMO 2021 regulations.

PROTECTION: Implement risk control measures and contingency plans, benefit from a free phishing penetration test, and get access to educational materials for your staff and IT personnel.

DETECTION: Any deficiencies in software and security systems could render a vessel “unseaworthy”. IEC Telecom’s multi-layer cyber security coverage offers threat protection, antivirus, scanning, continuity and advanced reporting.

RESPOND: Benefit from our advanced threat protection system. Apply quarantine, archiving, and continuity to suspicious emails; receive antivirus updates in timely manner, and more.

RECOVERY: Ensure business continuity by implementing a comprehensive cyber security policy onboard. We will help to choose the right set of applications for the particular requirements of your vessel and offer advice on how to meet the new regulations in the most efficient manner.
