

# ONEMonitor

powered by DigiGone

## Optimised software-controlled CCTV system

Especially designed to extend the capabilities of a remote CCTV, not only does OneMonitor offer full visibility over assets, located in areas with no/limited GSM coverage, but also allows to improve operational processes by enabling a real-time overview of far-away activities.

OneMonitor, powered by DigiGone, is a software-controlled CCTV system that operates on managed bandwidth communication solutions and is easily accessible on a laptop, smartphone or tablet.

OneMonitor is optimised for a low-bandwidth environment with the consumption rate ranging from as low as 6Kbps up to 500Kbps. As such, it is perfect for use in the maritime sector and remote land areas.

### OVERVIEW

#### • Cost-effective

Ability to remotely monitor assets in real-time, simultaneously and securely

#### • Secure

Based on the AES 256-bit encryption, all the communication between remote sites and the monitoring application is secure

#### • Efficient

Designed to enhance the operational efficiency of remote assets, field personnel, and revenue

#### • Easy Integration

Adds remote monitoring capabilities to an existing CCTV system and compatible with most cellular and satcom platforms

### MONITORING AS PER YOUR CHOICE

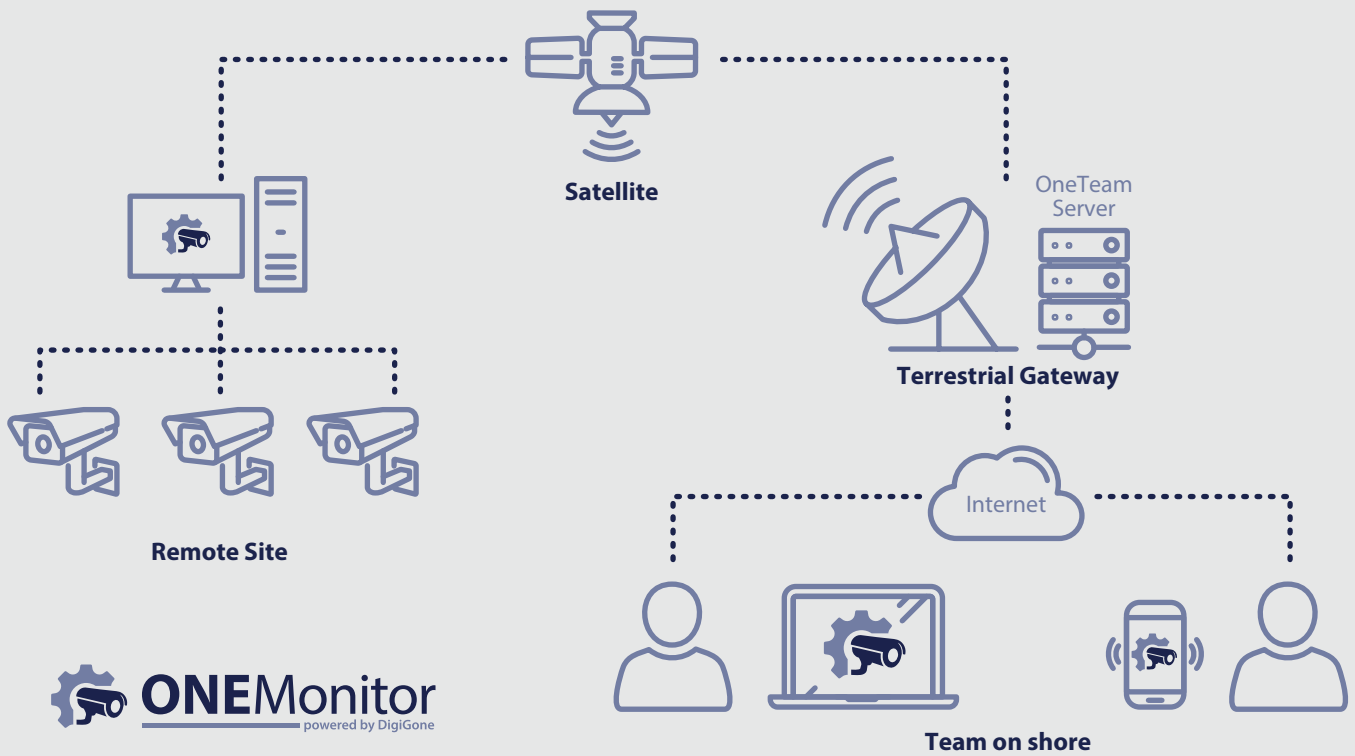

OneMonitor transmission preferences can be set to suit your operational requirements from automatic still image capture to real-time streaming. It also offers a live multi-camera view for advanced surveillance.

### ACCESS/VIEW/CONTROL

OneMonitor CCTV system can be remotely accessed and managed by HQ, managers, security and other authorised personnel. It offers both audio and visual surveillance.

### REMOTE RESOLUTION & BANDWIDTH CONTROL

Camera resolution can easily be adjusted between 160x120 and 720P with bandwidth ranging from 6Kbps to 300Kbps.

## REMOTE DATA RETRIEVAL

OneMonitor supports forensic investigations and incident reviews with remote access to recorded data from a vessel or site operation. It offers immediate direct downloads of selected clips to your desktop computer.

## ALARMS AND NOTIFICATIONS

Upon contact or video motion alarm triggering, OneMonitor can send audio and visual signals as well as email notifications to your computer or phone. It offers a snapshot of the area under surveillance as an attachment.

## ABOUT OPTICONNECT

OneHealth is one of the applications included in the OptiConnect suite by IEC Telecom. Powered by DigiGone, this app portfolio offers a wide range of communications devices, designed to operate in a low-bandwidth environment:

- OneAssist: remote maintenance delivered over hands-free handset
- OneHealth: portable digital telemedicine kit
- OneTeam: optimised application for videoconferencing
