

EUTELSAT ADVANCE

Dynamic, High throughput Connectivity Services

Eutelsat ADVANCE is an end-to-end managed connectivity service with redundant coverage in high-traffic regions. Purposefully designed for business continuity, it offers dependable connectivity to maritime, enterprise, government, and telecom institutions. Eutelsat's service benefits include:

High-speed network with high-power capacity

Seamless connectivity with 99% reliability

Secure back-haul services

FLEXIBLE SOLUTIONS

Service plans and bandwidth can be increased or decreased on-demand - with no commitment required for duration or volume

GLOBAL REACH

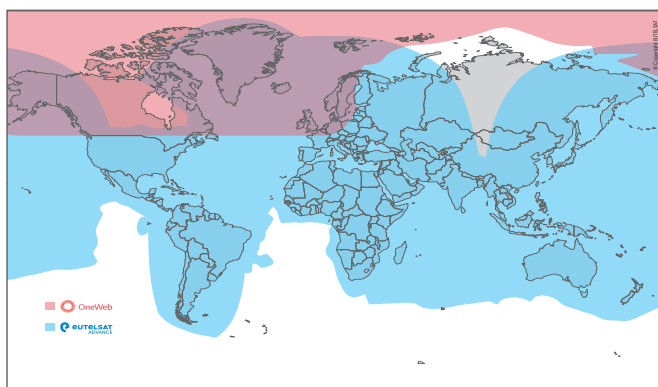

Seamlessly integrates Ku- and Ka-band capacity to reach any remote location, independent of infrastructure or terrain, over a single platform

CUTTING-EDGE TECHNOLOGY

Integrated future-proof platform, inclusive of network management and monitoring tools with intelligent band allocation and analytics

USER-CENTRIC EXPERIENCE

Control over services with dynamic interfaces, ability to deploy connectivity to remote sites and activate services or updates at the touch of a button

ENTERPRISE

Eutelsat ADVANCE offers ready-to-use plans for high-end connectivity services across multiple sectors. ADVANCE provides business-ready high-speed internet and dedicated solutions for the practical needs of a modern enterprise, from small home offices to large corporations.

GOVERNMENT

Eutelsat offers a comprehensive portfolio of solutions for government activities. Eutelsat ADVANCE Government is a fully on-demand, secure, robust service with no commitment obligations. It provides a cutting-edge service platform accessible via API, allowing partners to define and control their service packages according to their specific government needs.

MARITIME

Eutelsat ADVANCE Maritime provides powerful, extensive coverage for maritime services around the world. It offers total flexibility for industrial bandwidth requirements while providing guaranteed performance, customised service, and SLAs for VIP vessels.

The maritime range includes solutions to meet specific demands of diverse market segments. Eutelsat service provides resilient global coverage for merchant ships, per-ship connectivity plans for yachting, tailor-made offers for the offshore sector, and more.

TELECOM

Eutelsat ADVANCE Back-haul is a suite of tailored solutions that are designed for mobile operators, carriers, service integrators, and rural connectivity operators. It offers resilient connectivity for all markets and regions, including rural and dispersed areas. Eutelsat provides flexible, scalable, and reliable solutions that offer end-to-end coverage expansion tailored to telecommunication requirements.
