APPLICATIONS

SATCOM ENABLER FOR BUSINESS & WELFARE APPLICATIONS

WHY THURAYA WE?

PERSONAL USE

CORPORATE USE

- Enjoy satcom at the cost of GSM
- Ensure business continuity
- Elevate your CSR program
- Reliable connectivity for emergencies
- Enable corporate apps for remote teams

THURAYA WE: HARDWARE OVERVIEW

SATELLITE & LTE

A single SIM for satellite & LTE usage. Flexible connection between both networks (automatic or manual selection)

MULTIPLE CHANNELS

SMS, voice and data connectivity. WiFi connectivity in a 30m range. Connectivity for multiple smart devices (up to 10)

WITH YOU EVERYWHERE

Lightweight and portable device to keep you connected

USER FRIENDLY

Easy-to-use web interface to manage network selection, data consumption, system alerts, and access settings

THURAYA WE: SPECIFICATIONS

- System/Frequencies:
 - Satellite: Thuraya L-band satellite
 - GSM: 3G/4G LTE: 800 MHz, 850 MHz 900 MHz, 1800 MHz, 2100 MHz, 2600 MHz
- Dimensions: 230 x 197 x 24 mm
- Weight: 1.1 kg
- 1 SIM card slot (mini)
- Voice and messaging services:
 - Circuit-switched satellite calls
 - VOIP with 3rd party apps
 - SMS
- Data services:
 - Standard data up to 384kbps
- Battery life (Transmission):
 - GSM: up to 9h
 - Satellite: up to 3h
- Battery life (Stand-by Time):
 - GSM: up to 15h
 - Satellite: up to 6h
- Global Navigation Satellite System (GNSS): GPS, BeiDou, Glonass
- Interfaces: WiFi for up to 10 users
- Router features: Firewall, Mac Filtering, DMZ, NAT, Port
- Forwarding Ingress Protection: IP54 multi-language firmware 8 supported

AIRTIME FLEXIBILITY

ATTRACTIVE PREPAID

Manage your consumption volume and budget. Avail additional data bundles and activate when required.

POST PAID

Wide range of tariffs from entry to unlimited with no long-term commitment. Flexible upgrade/downgrade. Ideal solution for prolonged deployments.

BULK AIRTIME

Create a plan of your own with our bulk airtime offer. Distribute allowance amongst your remote teams based on project needs while enjoying flexible suspension and reactivation terms.

ADD-ON: WELFARE APPLICATIONS

**OFFER YOU'RE A COMPREHENSIVE
WELFARE PROGRAM TO REMOTE
WORKERS**

CREW WELFARE

enhance the morale and well-being of teams deployed remotely for a long time

SHARED CONNECTIVITY

multiple team members can share the same WiFi connection

BRING YOUR OWN DEVICE

videoconferencing with family and loved ones via personal gadgets

ADD-ON: CORPORATE APPLICATIONS

Do not restrict your communication when GSM coverage is limited or unavailable. Get the most out of your satcom data with our business applications designed to deliver a high-end user experience over L-band.

Hands-free video-streaming solution with voice control functionality

[DOWNLOAD BROCHURE](#)

Cost-effective email management service for a single subscription

[DOWNLOAD BROCHURE](#)

Flawless messaging & videoconferencing in an ultra-low bandwidth environment

[DOWNLOAD BROCHURE](#)

OneAssist

Remote Maintenance

OneAssist is a hands-free video-streaming solution with voice control functionality.

- **VIDEO STREAMING:** enables streaming of videos and shares snapshots in real-time
- **LOW BANDWIDTH:** operates in ultra-low bandwidth environments as low as 40Kbps
- **COST EFFECTIVE:** saves customers time and money by virtually bringing a subject matter expert to the source of the problem
- **SECURE:** encrypted end-to-end (AES 256 encryption)

Ideal for remote technical support, inspections, and equipment commissioning in the remotest of locations

OneTeam

Messaging & Videoconferencing

OneTeam is specially designed to offer connectivity in areas with limited or no GSM even over extremely limited bandwidth.

- **OPTIMISED VIDEOCONFERENCING:** for operations in areas with limited/no GSM coverage
- **ADVANCED VISIBILITY:** experts from HQ and vendors may examine the issue first-hand via video stream and guide remote teams in real-time
- **FILE EXCHANGE:** support files (from schematics and drawings to technical manuals and operational guides) can be transferred via chat, assisting remote teams to fix a problem/apply an update as and when required without the need to send a technician onsite

OneMailLite

Email Management for a Single Subscription

Typically used by customers who require no more than one email subscription, OneMailLite allows for simple email management, both onsite and remotely.

- **MAX EFFICIENCY OVER EXPENSIVE CIRCUITS:** files compressed up to 95%, thereby directly saving on airtime costs
- **ENCRYPTED AND SECURE:** multiple virus scanners and spam filters to ensure the mail received is safe and relevant
- **MAIL FLOW FILTERING:** ability to whitelist or blacklist email addresses and manage mail flow
- **LOSS-FREE TRANSFERS:** resumes transfer without any loss of data from the point-of-interruption

The background of the slide is a dark blue color. It features a stylized globe of the Earth in the center, rendered in a lighter blue. Overlaid on the globe and extending across the entire width of the slide is a complex network of white lines and dots. The dots are of varying sizes and some are glowing with a bright white light. The lines connect these dots in a web-like pattern, suggesting a global communication or data network. The overall aesthetic is modern and technological.

**Rediscover Thuraya WE
USE CASES**

HUMANITARIAN

CHALLENGES:

- Need for mobile, flexible, and easy-to-deploy solutions for instant communication in areas with no/limited GSM coverage
- Corporate/mission-specific applications not accessible in remote areas

APPLICATION:

- Easy-to-use device with user friendly interface, enabling instant connection in remote areas
- Corporate applications made accessible to all teams and missions no matter how remote
- Back-up for GSM network

ELECTIONS

CHALLENGES:

- Many polling stations are based in areas with limited/no GSM coverage
- High possibility of network shutdowns at national/district levels

APPLICATION:

- Cost-effective back-up for GSM network
- Business continuity enabled via messengers, email service, and videoconferencing
- Voice & data for emergency communications

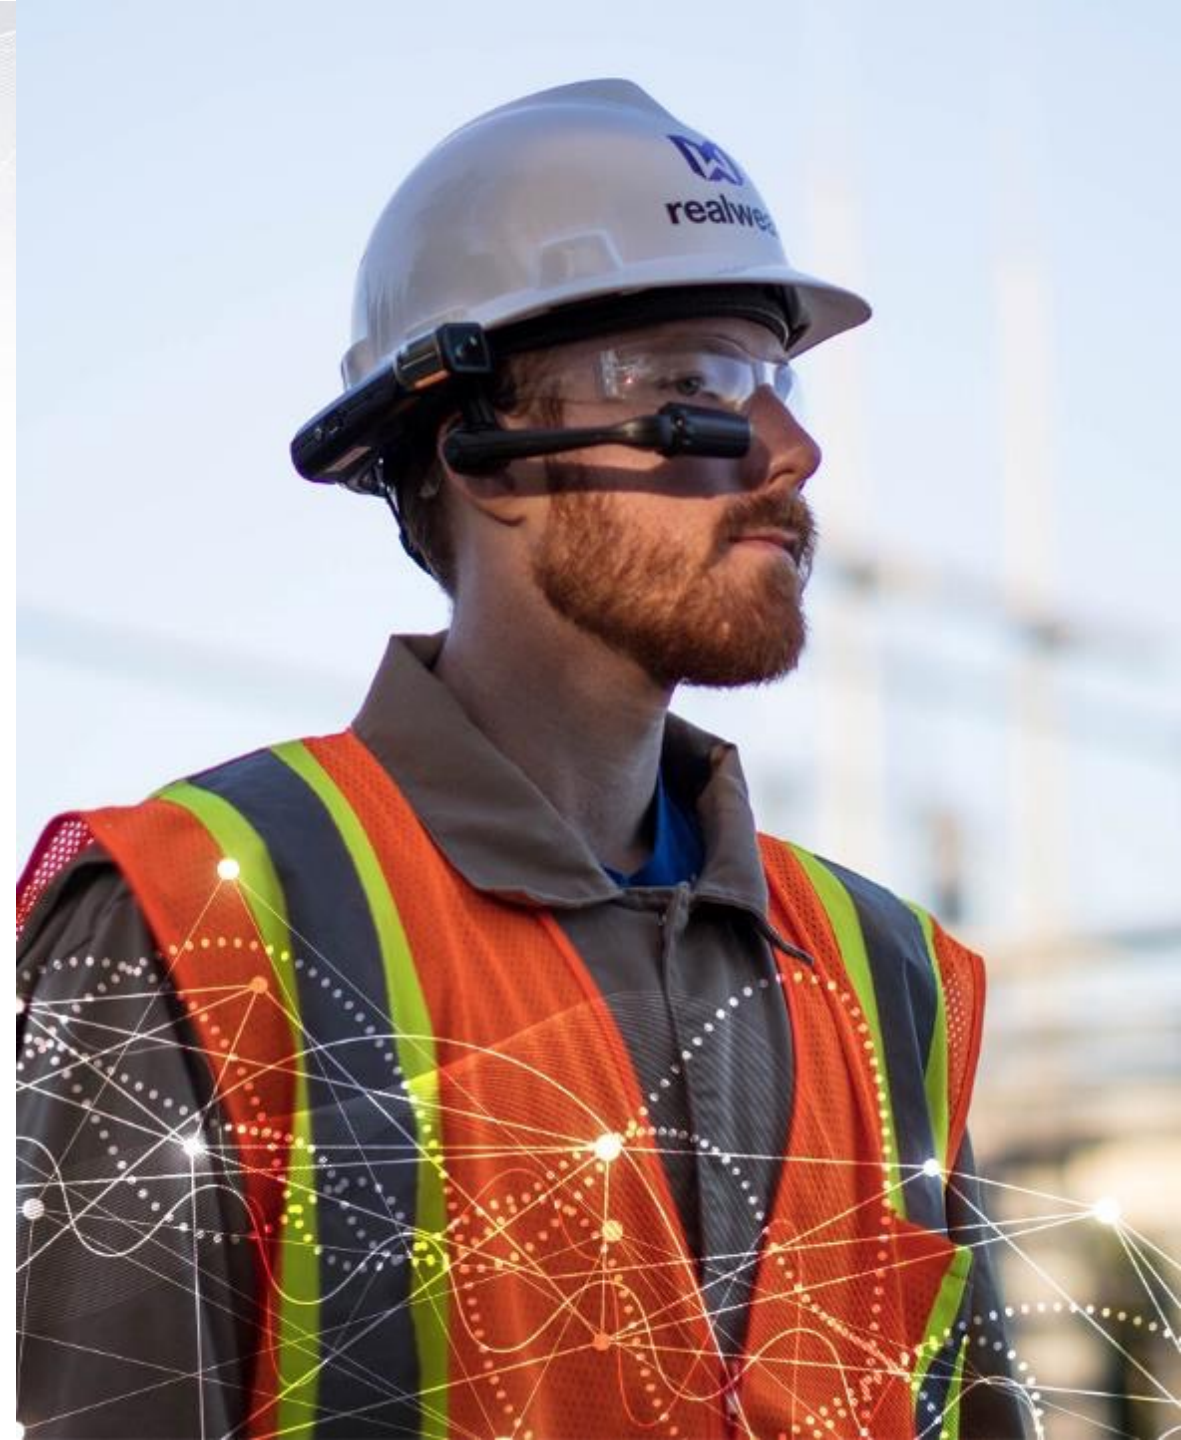

ENTERPRISE

CHALLENGES:

- Important updates and instructions not communicated in time, resulting in loss of valuable time and additional costs
- Safety of remote workers

APPLICATION:

- Virtual troubleshooting and guidance provided over a hands-free headset reduces the need to keep an extended team onsite; thus, reducing the total cost of maintenance in hard-to-reach locations
- Portable and dependable solution for corporate communication from anywhere
- Improved safety for remote operations
- Voice & data for emergency communications

LEISURE

CHALLENGES:

- Away from family and friends for prolonged time periods
- Interruption in business communications due to delayed instructions and slow exchange of important updates pose risks to sustainability of the operational cycle

APPLICATION:

- Personal: staying in touch with friends and family for love and support no matter how far the journey is extended
- Business: operational continuity via email services and videoconferencing specially optimised for low bandwidth environments
