

FIXED

STARLINK

STANDARD ACTUATED

Powered by the world's largest constellation of Low Earth Orbit (LEO) satellites, Starlink offers broadband network coverage of up to 220 Mbps. Suitable for harsh weather conditions, Starlink fixed satellite antenna provides an ideal broadband connection for data-intensive activities such as business applications, streaming, and video calls. The simple design of Starlink antenna and its associated kit (Wi-Fi router, cables and cradle) ensure efficient installation in just a few minutes.

Starlink is available without any long-term commitment. Customers can sign up for monthly or long-term subscriptions. Offering flexibility in satellite connectivity, it is also possible to temporarily suspend the subscription.

Starlink is the ideal solution for accessing the internet from remote locations and ensuring business continuity in the event of a main network outage.

FEATURES

LEO satellite connectivity

High-speed connectivity

Low-latency technology

Fixed and portable use

Motorised, automatic orientation

Easy to install

SPECIFICATIONS

ANTENNA TYPE

Electronic phased array
Motorised self-orientation

WEIGHT

Antenna: 2.9 kg (without cable);
3.6 kg (with cable)
Router: 1 kg

DIMENSIONS

Antenna: 30.3 x 51.3 cm
Base: 32.8 x 56.3 cm
Router: 25.4 x 18 x 6.5 cm

OPERATING TEMPERATURES

from -30 to 50°C

PROTECTION RATING

IP54

CABLES

Starlink: 15.2m
AC Router: 1.8m

RADIO

Dual band - 3x3 MIMO

SAFETY

WPA2

Wi-Fi

IEEE 802.11 a/b/g/n/ac

FIELD OF VISION

100°

AVERAGE ELECTRICITY CONSUMPTION

50 to 75 W

USE CASES

HUMANITARIAN

Increase mobility and reduce response times for first responders with low-latency technology. Provide high-speed connectivity for long-term deployments of refugee camps and offices for humanitarian teams.

ENTERPRISE

Access high-speed connectivity with a monthly package to meet your company's evolving needs. Ensure your business is connected wherever your operations take place.

COMMS ON-THE-MOVE (COTM)

Access the internet with a low-latency, streaming-capable device that can withstand harsh environments and boasts enhanced GPS capabilities. Get the network coverage you need.

WORK FROM HOME

Quickly set up continuous and reliable broadband access with a permanent installation. Access a quality connection for video calls, online games, VPNs, and other bandwidth-intensive activities.
