FIXED

STARLINK ENTERPRISE
HIGH-SPEED CONNECTIVITY FOR BUSINESSES

Powered by the world's largest constellation of low-earth orbit (LEO) satellites, Starlink delivers high-speed connectivity of up to 220 Mbps to support a wide range of digital operations. The low-latency network (average latency of 20 ms) offers remote management even when the dish is offline to maximise operational efficiency. Resilient and flexible, Starlink Enterprise has been specially designed to easily integrate on the Local Area Network (LAN) as either a primary link or a back-up that supports SD-WAN and IPSec. The antenna comes with a longer cable (50m) and the ability to directly connect third-party routers and bespoke set-ups. With no long-term commitment, customers can avail month-to-month plans and even put the service on pause as required. Starlink Enterprise is best suited for power users and fixed site corporate applications.

FEATURES

High-speed connectivity

Low latency

No long-term commitment

IP67 rating

Directly connects to third-party routers

Easy installation

SPECIFICATIONS

ANTENNA TYPE
Electronic phased array
Software-assisted manual orientation

WEIGHT
Antenna: 2.9 kg
Power Supply: 1.5 kg

DIMENSIONS
Antenna: 39.7 x 383 x 594 mm
Power Supply: 46 x 133 x 288 mm
Mount: 50 x 298 x 145 mm

OPERATING TEMPERATURE
-30°C to 50°C

ENVIRONMENTAL RATING
Antenna: IP67 Type 4
Power Supply: IP66

WIND RATING
96 kph+

SNOW MELT CAPABILITY
Up to 40 mm / hour

FIELD OF VIEW
110°

POWER
100 – 240V – 6.3A 50 – 60 Hz

POWER CONSUMPTION
75 – 100 W

WALL MOUNT (INCLUDED)

USE CASES

BUSINESS OPERATIONS
Access high-speed broadband connectivity with a month-to-month service plan to meet evolving business requirements. Facilitate IPSec Tunnel, SSL VPN, and SD-WAN configurations with a dynamic public IP in NAT.

HUMANITARIAN
Ensure quick connectivity for first responders with low-latency technology. Enable high-speed network access for long-term deployments at humanitarian camps akin to remote office operations.

HOME OFFICE
Quickly set up consistent broadband access with a permanent installation. Access a reliable link for clear video calls, VPNs, and more.
