maintenance, and technical  
support

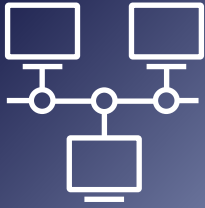

### **CLOUD, BACKUP & COLLABORATION**

Secure cloud, Microsoft 365,  
backup, and continuity  
solutions

# AREAS OF EXPERTISE

WHAT WE DELIVER FOR LOCAL ENTERPRISES

## MANAGED IT INFRASTRUCTURE

We design, deploy, and manage secure IT environments, including networks, servers, firewalls, storage, and user systems. Our solutions improve performance, reduce complexity, and maintain reliable access to critical business systems.

01

## CYBERSECURITY & NETWORK PROTECTION

Protect networks, endpoints, users, and business data through advanced firewall management, endpoint security, secure access controls, monitoring, and layered protection against evolving cyber threats.

02

## CLOUD, BACKUP & BUSINESS CONTINUITY

Secure business-critical data with flexible cloud and on-premise backup solutions. Our services support disaster recovery, data resilience, secure storage, and long-term business continuity.

03

## SECURE COLLABORATION & EMAIL SERVICES

Enable productive and secure communication through Microsoft 365, business email platforms, collaboration tools, and protection against spam, malware, phishing, and unauthorized access.

04

## MONITORING, SUPPORT & MAINTENANCE

Maintain stable and secure IT operations through continuous monitoring, proactive maintenance, troubleshooting, centralized visibility, and professional technical support.

05

# IT & CYBERSECURITY PACKAGES

SOLUTIONS DESIGNED FOR MODERN ENTERPRISES

## ADVANCED NETWORK MANAGEMENT & MONITORING

Centralized management of network infrastructure using enterprise-grade firewalls, performance monitoring tools, and secure access controls.

- ✓ Centralized firewall and network management
- ✓ Real-time visibility on usage, traffic, and throughput
- ✓ End-user dashboards for monitoring and reporting
- ✓ Continuous performance and availability monitoring

## ENDPOINT SECURITY

Flexible endpoint protection packages adapted to each customer's security maturity and business risk.

**Basic Protection:** Antivirus, device control, mobile protection, and support

**Intermediate Protection:** Adds firewall management capabilities

**Advanced Protection:** Includes detection and response, threat intelligence, and proactive threat hunting

## DATA STORAGE & BACKUP SOLUTIONS

Secure storage and backup options designed to protect business-critical data and support disaster recovery planning.

- ✓ Integration of Network Attached Storage for on-premise data control
- ✓ Optional cloud backup services for disaster recovery and business continuity
- ✓ Secure data management tailored to operational requirements
- ✓ Backup options aligned with customer infrastructure and compliance needs

## SECURE COLLABORATION & EMAIL SERVICES

Business-grade communication and collaboration solutions to improve productivity while protecting users from email-based threats.

- ✓ Deployment of secure email solutions, including Microsoft 365 or alternative platforms
- ✓ Protection against spam, malware, phishing, and unauthorized access
- ✓ Secure communication tools for business teams
- ✓ Collaboration platforms adapted to customer needs

## OPTIONAL ENHANCEMENTS & MANAGED SERVICES

Domain integration

IT infrastructure management

Centralized monitoring and reporting

Continuous maintenance and support services

Modular options based on customer requirements
